

Face masks help us stay safe

There

is

a

new

illness

Coronavirus

There

are

many

different

ways

to

stay

safe

One

way

is

to

wear

a

face

mask

a

A

face

mask

covers

a

person's

nose

and

mouth

This

helps

to

prevent

the

spread

of

germs

Germs

get

slowed

down

by

the

face

mask

This

makes

it

harder

for

germs

to

spread

to

other

people

When

we

slow

down

the

spread

of

germs

more

people

stay

healthy

I

might

see

a

lot

of

people

wearing

face

masks

when

I

leave

the

house

It

is

different

to

see

people

wearing

face

masks

I

cannot

see

people

smile

when

they

wear

a

a

face

mask

That

is

okay

I

know

they

are

smiling

underneath

the

face

mask

I

know

that

people

wearing

a

a

face

mask

are

helping

to

keep

me

healthy

Everyone

is

doing

their

part

to

stay

safe
