

Making Salt Dough Starfish

Ingredients:

- 2 cups flour
- 2 cups salt
- 1 cup water

Directions:

Put flour, salt and water in large bowl, mix. Knead dough with your hands until it is soft.

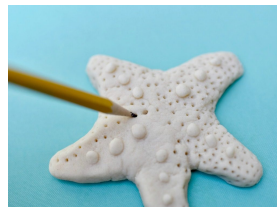

To create a starfish shape, start with a ball of dough. Gently pull out five “blobs” evenly spaced around the center to become the arms.

Gently pull on each arm and shape it to look like a starfish; push down to flatten it. Make them skinny or fat!

Decorate your starfish! Use a pencil to poke holes in it. Or add extra dough to create bumps or ridges.

Put on ungreased cookie sheet and bake at 325 degrees until firm to the touch – about one hour for small starfish, up to two hours for larger starfish.
